## About me

I am a web developer having expertise in frontend development and exposure to back-end development. I design and develop web applications using the latest technologies to deliver the product with quality code.

## Experience

### SmartStream Technologies PVT LTD

Feb 2020 - present

#### Software Engineer

2 years

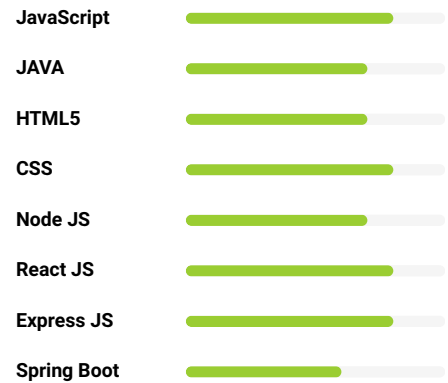

#### Project : RECS - PREMIUM

- Use my experience of development to define the structure, features and meta files for the project, making sure they are reusable.
- Triggering Jenkins job for the automation run over the weekend on latest release build.
- Represent my team in sprint reviews at the end of every alternate week.
- Attend the retrospective calls for understanding the requirements of the client.
- Arrange and initiate the TEAL catch up calls daily.
- Lead the demo of new functionalities developed by team in sprint review.
- Documenting videos of the stories implemented in each and every sprint for future reference.
- Concluding the documentation review & release activities as per the agile confluence page.
- Creating the sprint and adding tasks, bugs, stories, epics and spikes to the current sprint.
- Keeping the code quality high by reviewing code from other members and suggesting improvements in PR comments.
- Interaction with the UI/UX designer to suggest changes and to suggest possible improvements with added functionality.
- Involvement in taking Interviews and the recruitment process for selecting the appropriate candidates and setting the objectives for new joiners and guiding them.

## Career Objective

Recent computer science graduate with a passion for developing web applications and working across the full stack. I've built few web apps from the ground up using React, Node, and MongoDB.

## Technical Expertise

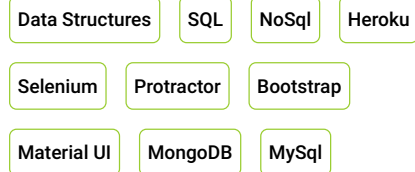

## Key Projects / Involvements

- Automated nearly 80% of the bugs and stories using GWEN framework tool. (Vanilla JS, DOM)
- Concluded the weekend automation run analysis on time.
- Reported the bugs which were caught during the run of existing as well as newly automated test cases.
- Upgraded all Java utilities to latest LOG4J which resolved vulnerability issues.
- Implemented Java Excel Difference Utility from scratch, also added enhancement for multi-sheet comparison which was later used in different project.(Cash Management System)
- Did merge activity of all hotfixes to the master branch after every release, also cherry-picking the same to parallel branch.
- Implemented VR Tool in existing framework which compares the expected and actual screenshots on UI.

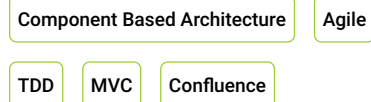

## Certificates and Awards

- Completed post graduate diploma in advanced computing from CDAC Kharghar - Mumbai.
- Achieved 1st rank in Mumbai region in final CDAC exam (CCEE) in database technologies module.
- Secured 7th rank throughout the course in CDAC Institute.
- Best performer award for consistently exceeding the performance and managers expectations for the year 2021.
- Completed certification - MERN STACK development course from GUVI GEEK IIT Madras Chennai in 2022.
- React - The Complete Guide (incl Hooks, React Router, Pusher) - Udemy
- JavaScript Basics for Beginners Certificate from Udemy
- SQL for Beginners: Learn SQL using MySQL and Database - Udemy
- Node with React: Fullstack Web Development - Udemy
- Recognition zero defect delivery. (Teal Team - Agile)
- Rest API Testing (Automation) from Scratch-Rest Assured Java - Udemy
- Learn Protractor (Angular Testing) from scratch + Framework Udemy
