WORK EXPERIENCE

Lead Engineer

BuzzyBrains Software Pvt Ltd

06/2022 - Present

Pune

Achievements/Tasks

- **OxRecognize** - Developed an AI-powered PDF decryption module for contracts in oil and natural gas trading, enhancing data security and compliance. **React.js (Typescript), Node.js (Express.js).**
- **BrandLuminaire** - Engineered a brand index scoring system utilizing AI models like Gemini and GPT-4o, analyzing weekly trends to provide actionable insights. **React.js (Redux), Thunk, Node.js (Express.js).**
- **RealityRegistry** - Created a video fingerprinting mobile app that allows users to capture and verify video authenticity, improving content integrity across social platforms. **React Native, FFMpeg, Canvas, Node.js.**
- **Growthgg** - Spearheaded the development of React UI for SMS/Email quota purchasing workflows, integrating Stripe payments to streamline user transactions. **Reactjs, Nodejs, Stripe, AWS (EC2, Lambda, Elastic Beanstack, IAM).**
- **TERUM** - Designed an admin web app for managing user interactions, including blocking/unblocking and quiz uploads, enhancing user experience and engagement. **Next.js, JWT Auth, Bootstrap, Material UI.**
- **TERUM** - Contributed to a social platform project similar to Instagram, focusing on UI development for the main screen and quizzes, integrating Lottie animations for improved user interaction. **React Native, Redux Saga, Lottie.**

Software Engineer

Smart Stream Technologies

02/2020 - 06/2022

Mumbai

Achievements/Tasks

- **RECS PREMIUM** - Contributed to the project by optimizing reconciliation tasks, resulting in increase in processing efficiency. **React.js**
- Enhanced API functionality, leading to improvement in response times for user requests.
- Developed automated test scripts with **GWEN**, achieving a reduction in bugs during the QA phase.
- Mentored junior developers on best practices in **React.js** fostering a collaborative learning environment that improved overall team performance.
